How it works

Your forms are **scanned** and stored as images. Fields of interest are defined once ...

... as a mask using the graphic editor. Then those fields are **interpreted** according ...

A scanned image of a form for 'MUSTERMANN' with employee number '123456'. The form includes fields for 'Mitarbeiter', 'Deleg.-Nr.', 'Vetter', 'sonnig', 'heiter', 'bewölkt', 'Niederschlag', 'Tag' (calendar), 'Monat', 'Jahr', and 'Zeit (Std.)'. The form is mostly blank with some markings.The same scanned form as above, but with a white mask overlay that highlights the fields of interest: 'Mitarbeiter', 'Deleg.-Nr.', 'Vetter', 'sonnig', 'heiter', 'bewölkt', 'Niederschlag', 'Tag', 'Monat', 'Jahr', and 'Zeit (Std.)'. The mask is a simple black border around each field.

... to their type. You receive **complete records** for your data base or application!

MUSTERMANN	12.10.33	3
SCHMIDT	10.08.44	1
LEHMANN	13.02.63	5
FELDMANN	01.09.82	3
KRUG	15.11.58	1
MÜLLER	21.08.75	3

Your advantages

- Rationalization of work process
- Obvious cost saving in data capture
- Possible improvement of data quality
- Data and images are at your disposal for archiving or saving without any additional costs
